CHILDREN WITH AXE IS FOUND DROWNED

Mrs. Mattie Galines, a Poor Widow, Robbed of Savings by Man She Meant to Marry, Goes Insane.

Mrs. Mattle Galines, a widow, be sides supporting four children, managed to scrape together by hard work for three years the sum of \$90. seemed a fortune to her.

To a man she loved and had promised to marry she intrusted her little fund. He vanished with it, and from that day widow was not right in her mind. To-day she became violently insane. attacked one of her children with an axe as he slept and nearly cut his head open, chased the others into a corner, where they fought with her for the axe, and was only overpowered by strong

Mrs. Galines lived at No. 97 North Fourth street, Williamsburg. After her husband's death three years ago she had worked in sweat-shops. In addition she saved the \$90-by what privations no one will ever know.

After her flance, a Newark brassworker named Anton Schiller, ran off with her savings three weeks ago she became moody. About daylight this morning her son John heard his brother Anthony crying. He started up in bed to see his mother throttling Anthony with one hand and raising the axe for a crushing blow with the other.

Blood was already streaming from Anthony's scalp. John leaped behind his mother and caught the descending arm. Then he had to defend himself and, although he shrieked for aid and little Charles and the wounded Anthony came to his help, they could not take the axe from their mother.

Waving it frantically, she drove them into a corner and then started apparently to kill them. John had just grasped the handle for what he believed would be the death struggle when neighbors broke in the door. They tied Mrs Galines and she was sent to Flatbush Hospital for observation.

Miss McKenna felt that something was wrong and went in search of McAlister. When she had found him she called his uncle, Daniel Smith. The two carried him into the house, where a doctor attended him.

It is supposed the man fell from some train unnoticed, although the absence of any valuables on the body of such a well-dressed man leads the police to believe that possibly there may have been foul play.

The dead man was about 5 feet 8 inches tall, weighed 175 pounds and was evidently a well-to-do business man. He was dressed in gray coat and vest and striped trousers, all of fine quality and the latest cut.

Mercury & Potash

CONTAGIOUS BLOOD POISON

They hide its repulsive form, and this serpent disease, stupefied by these drugs, lies dormant until the effects have worn off or treatment is discontinued, when it breaks down the mask and becomes as full of life and venom as ever. Mercury and Potash may dry up the sores and eruptions, but at the same time they drive the poison back into the blood and system, where it feeds upon the tender tissues, membranes and nerves, finally breaking out in most disgusting sores and even destroying the bones.

Mercury and Potash cannot accomplish a radical and permanent

cure. They have a palliative but not curative effect upon this treacherous, snake-like disease. Thesedru gs produce mercurial Rheumatism, destroy the teeth and corrode the membranes of the stomach and bowels, causing inflammation and dyspepsia, nervousness and general derangement of the system.

S. S. S. is a Specific for Contagious Blood Poison, and the only autidote for the peculiar virus that spreads so quickly throughout the system, corrupting the blood and infecting every organ and fibre of the body.

S. S. S. destroys the serpent, and eliminates every atom of poison from the blood, it makes a thorough and radical cure of the disease, and at the same time builds up the general health.
